5. The following questions have been received since the Pre-Bid Meeting:
 - a. **Q:** Are the cedar sliding barn doors to be 2 ¼ inches thick at their narrowest point or at their thickest point?
A: The cedar sliding barn doors are to have a maximum thickness of 2 ¼ inches.
 - b. **Q:** Are the cedar sliding barn doors to be finished or unfinished? If they are to be finished please supply the specifications for the desired finish.
A: For bidding purposes, assume the cedar sliding barn doors and all exterior trim are to receive one coat of latex-based primer and two coats of latex-based finish.
 - c. **Q:** Wall type 2 is an exterior wall with drywall on the inside, but is drawn on A1.0 without insulation. Is that correct?
A: That is correct; wall Type 2 does not contain insulation. The only wall insulation required is in the Type 1 wall, which is a 1-hour rated assembly (UL design No. U348) due to its proximity to the property line.
 - d. **Q:** Wall type 2 is an exterior wall with drywall on the inside, but is drawn on A1.0 without insulation. Is that correct?
A: That is correct; wall Type 2 does not contain insulation. The only wall insulation required is in the Type 1 wall, which is a 1-hour rated assembly (UL design No. U348) due to its proximity to the property line.
 - e. **Q:** At the prebid meeting, temporary fencing to secure an area for use by the town was mentioned. Please supply the length, height, and style of fencing, along with the number and sizes of gates desired.
A: Please refer to Bid Form item L.1.c.4 for the definition of the fence allowance.
 - f. **Q:** Will it be acceptable to use Hardie in lieu of the Boral trim?
A: Hardie trim is acceptable in lieu of Boral trim.
 - g. **Q:** Is there a color that has been selected for the vinyl siding?
A: The color for the vinyl siding has not been selected yet.
 - h. **Q:** For the Hardie Batten Siding, shall 16” on center for the battens be assumed so there are no exposed fasteners inside?

- A: Yes.
- i. **Q:** For the Hardie Batten Siding, are the panels to be smooth or wood grained?
A: The panels shall be wood grained.
- j. **Q:** For the Hardie Batten Siding, shall the panels and trim be prefinished by the manufacturer or primed and painted in the field?
A: The panels and trim shall be prefinished by the manufacturer.
- k. **Q:** Based on the description for cupolas on the bid form, there are 3 (Model Monterey) that are an add alternate. However on A3.0 it mentions there are 3 for the base bid (Model Redwing). Please confirm that 3 Redwings (painted) are to be included in the base bid with an alternate price for 3 Montereys.
A: Correct. The base bid shall include three Redwing cupolas and Alternate 3 is the difference in cost for three Monterey cupolas per Alternate Bid Note 5 on A3.0, A3.1, etc.
- l. **Q:** Please provide a detail for connections at the new slab to the existing slab/foundation; does this require pinning?
A: Pining is not required, however all new slab edges are to be thickened per details in the drawings.
- m. **Q:** Regarding the foundation wall that is to be removed between the existing slabs. The drawing indicates to bring top of foundation wall to 8" below grade. The slab infill here will only be about 8" wide which will be difficult for pins to be installed as well as compacting backfill under the new slab. Shall we figure a minimum of 12" slab removal on either side of the wall to allow for ease of back filling and not having such a narrow infill?
A: Pinning is not required. All slab infill shall be thickened to 8-inches, so the infill will bear on the wall, which will be demoed to 8-inches below the finished slab.

All other terms and conditions remain unchanged. Acknowledge your receipt and inclusion of this Supplement No. 1 on the proposal form in the space provided.

Notice
To All Mason Contractors and Interested Parties
Regarding Construction Pursuant to Section 31-53 of the
Connecticut General Statutes (Prevailing Wage)

The Connecticut Labor Department Wage and Workplace Standards Division is empowered to enforce the prevailing wage rates on projects covered by the above referenced statute.

Over the past few years the Division has withheld enforcement of the rate in effect for workers who operate a forklift on a prevailing wage rate project due to a potential jurisdictional dispute.

The rate listed in the schedules and in our Occupational Bulletin (see enclosed) has been as follows:

Forklift Operator:

- **Laborers (Group 4) Mason Tenders** - operates forklift solely to assist a mason to a maximum height of nine feet only.
- **Power Equipment Operator (Group 9)** - operates forklift to assist any trade and to assist a mason to a height over nine feet.

The U.S. Labor Department conducted a survey of rates in Connecticut but it has not been published and the rate in effect remains as outlined in the above Occupational Bulletin.

Since this is a classification matter and not one of jurisdiction, effective January 1, 2007 the Connecticut Labor Department will enforce the rate on each schedule in accordance with our statutory authority.

Your cooperation in filing appropriate and accurate certified payrolls is appreciated.
