

Ames Trail Bridge Construction

Keeping open space trails passable and safe takes work.

[Land stewards](#) do regular maintenance, but occasionally a special job needs completion.

The Open Space Commission thanks the Lyme Old Lyme High School Environmental Club and its faculty adviser Heather Fried for their work in constructing a hardwood bridge over a muddy Ames Open Space trail section.

Thanks also to open space stewards Jim Mildrum for milling the wood from local timber and Wayne Abrahamson for pre-drilling the massive planks. Kudos too for the Old Lyme Hardware for its donation of drill bits.

Folk hiking the Ames Open Space blue trail will have drier boots & shoes!
