- ❑ The Lymes’ Senior Center is a municipal agency that is part of the towns of Old Lyme and Lyme and serves both retired and working members of the community 55 and better. It also houses the local VFW post, town nurse and is the respite center during weather emergencies/power outages.
- ❑ The center was built in 1995-96, with HVAC upgrades accomplished in 2016. Both towns are responsible for the building and grounds with a 75/25 split in funding.
- ❑ All programs and activities offered at the center are funded solely by membership dues and donations.
- ❑ The building committee was charged by the towns to look at renovation and reconfiguration of the center in response to increasing challenges meeting the needs of its membership.

# Membership and Usage

---

The Lymes' Senior Center is a vital component of the two towns' social services for the elderly, needy, and those with limited resources and mobility. Our two towns have a median age of 48-51 (vs 40 in CT) and we have approximately 1,600 residents age 70 and older:

- ❑ Currently has over 1,100 members
  - ❑ Pre-pandemic, membership had peaked at 1,006 members.
  - ❑ Membership dropped to a low of 554 during the COVID closure
  - ❑ Membership has now fully recuperated and surpassed previous highs!
- ❑ Cross-town usage is common in our regional area.
  - ❑ About 10% of members are from out-of-town.
  - ❑ Out-of-town members are charged \$10 membership dues (vs \$5 for residents).
- ❑ LSC had over 29,000 annual visits in 2022. That equates to over 550 visits per week, over 100 visits per day!

# Considerations and Challenges

---

## Physical

- (-) Roof and siding have deteriorated over time
- (-) Covered overhang is small and emergency vehicles cannot fit under the overhang
- (-) Flow is confusing, accessibility to certain areas is limited
- (+) Bones and internal mechanicals considered to be sound
- (+) HVAC is no more than six years old

## Program

- (-) The space is too small for the number of programs being offered
- (-) Unable to conduct simultaneous programs even though the demand is there
- (-) Flooring is not suitable for dance, exercise and yoga programs
- (-) Wait lists have become common due to space constraints

# Ranked Spending Priorities

- ❑ Multiple user feedback sessions were facilitated to identify issues and concerns.
- ❑ A 'ranked spending' approach highlighted 3 priority needs.
- ❑ These priorities are evident in the renovated design.

THE ENTRYWAY SPILLS DIRECTLY OUT INTO ACTIVE SPACE.

---

THE MAIN INTERIOR SPACE IS TOO SMALL, INFLEXIBLE, AND NOT CONDUCTIVE TO THE ACTIVITIES THAT TAKE PLACE.

---

THE SENIOR CENTER SHOWS WEAR AND TEAR INSIDE AND OUT. THE OVERHANG IS TOO SMALL FOR EMERGENCY VEHICLES AND THE 9-TOWN BUSES.

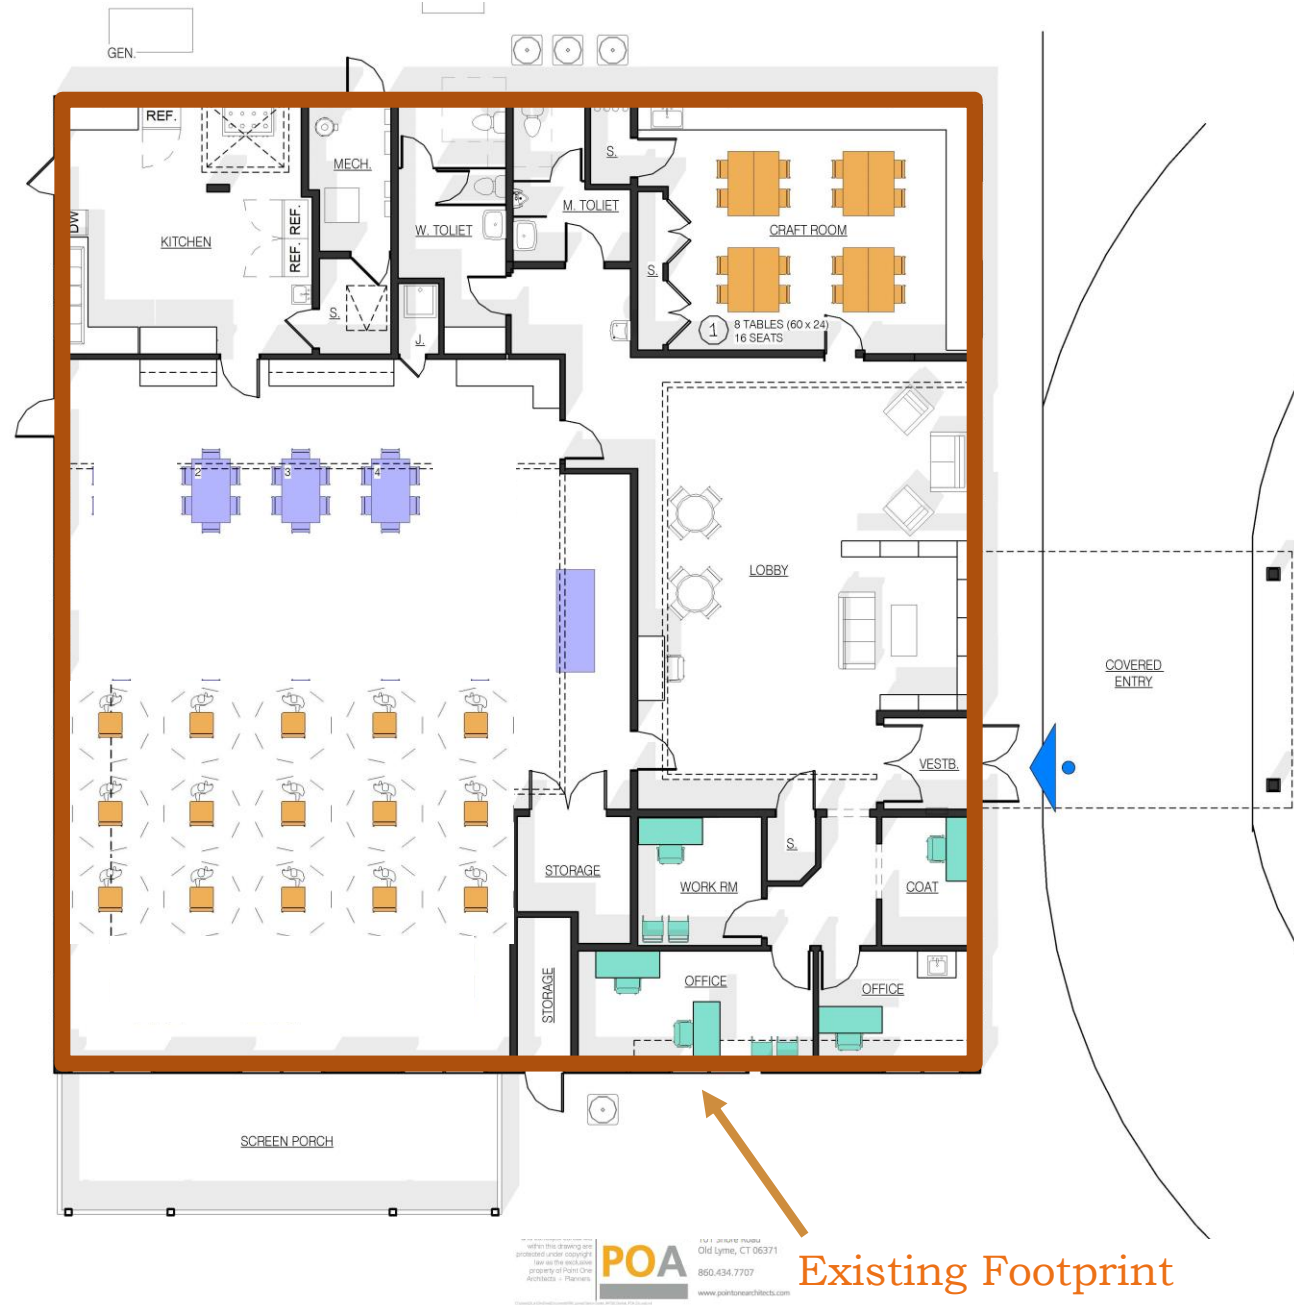

# Existing Layout

- ❑ Covered entryway too low for emergency vehicles
- ❑ Undefined front lobby spills directly into multi-use activity space
- ❑ Only two program spaces: one great room; one enclosed room
- ❑ Two different floor surfaces in the one space
- ❑ Extremely limited storage space
- ❑ No logical flow

Existing Footprint

# New Layout!

- ☐ Enlarged overall footprint
- ☐ Redesigned entryway and connecting hallways
- ☐ Greeting space and quiet library room
- ☐ Enlarged kitchen space
- ☐ Motorized partitions
- ☐ Multiple configuration possibilities, eg:

*Single large space with smaller group in separate room*
